SKILLS

- **Frontend Engineering:**
  React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Architecture & Performance**:
  Code Splitting, Lazy Loading, Lighthouse Optimisation, SSR/SSG
- **State & Data Layer**:
  Context API, Redux Toolkit, REST API Integration
- **UI Systems:**
  Tailwind CSS, SCSS, Ant Design, Responsive, Material UI & Accessible Design
- **Testing & Quality:**
  Jest, React Testing Library (familiar), Selenium (basic)
- **Security & Auth:**
  JWT, SSO
- **Tools & Design:**
  Git, Jira, Redmine, Figma, Adobe XD

WORK EXPERIENCE

City Bank – Senior Software Engineer
June 2024 –Present Dhaka, Bangladesh

- Designed and delivered a high-throughput Helpdesk system handling **2,500–3,000 daily requests** with high availability
- Built an Expedite Payment platform processing **7,000–10,000 monthly transactions** across multi-entity workflows
- Architected a **distributed frontend platform integrating 26+ applications** via centralized SSO, enabling seamless cross-application navigation and scalable ownership
- Engineered scalable frontend systems using React and Next.js with real-time data fetching
- Improved **performance** and load time through code splitting, lazy loading, and efficient API handling.

QCOOM (E-commerce) – Software Engineer (Front-End)
January 2023 –June 2024 Dhaka, Bangladesh

- Led frontend development of a **multi-service platform ecosystem** (e-commerce, food delivery, logistics)
- Supported high-scale operations including:
  1,000–1,500 daily e-commerce orders
  700–1,000 daily food delivery requests (QFood)
  25,000–30,000 monthly logistics operations (Piickme Express)
- Built scalable, modular frontend architecture using React, Next.js, and Tailwind CSS
- Delivered performance improvements across SEO, page load, and responsiveness
- **Mentored** and guided junior developers, fostering skill enhancement and a collaborative team environment.

Remote – Software Engineer (Front-End)
June 2023 –November 2024 Dhaka, Bangladesh

- Successfully delivered **8+ responsive** and interactive React, HTML, CSS, and JavaScript websites, showcasing meticulous attention to **pixel-perfect UI** implementation
- Ensured consistent and flawless UI design across various devices, emphasizing a visually appealing and user-friendly experience
- Ensured **cross-browser compatibility** and responsive design, optimizing user engagement across various devices

- Played a key role in **project planning and decision-making** processes, contributing to technical strategies

Tiger IT Bangladesh Ltd – Front-End Engineer
May 2019 – January 2023 Dhaka, Bangladesh

- Collaborated seamlessly with design, product, and back-end teams to conceptualize and deliver multiple web and cross-platform products
- Spearheaded a remarkable **95% improvement in Performance**, Accessibility, and SEO, surpassing Lighthouse standards
- Built HR **system managing 300+ employees**, improving operational efficiency and workflow automation
- Consuming and integrating restful API in a JS application and optimized application for maximum speed
- Design a cross-platform app using Ionic, React, and SCSS for daily task assign

CERTIFICATIONS & COURSE

- Certificate on JavaScript Programming | Stydysection
- HackerRank CSS Certificate | Hacker Rank
- Product Management Essentials | Udemy
- Product Management Crash Course | Udemy

EDUCATION

Daffodil International University - Bachelor of Science, Computer Science & Engineering
January 2015 – December 2018 Dhaka, Bangladesh

PROJECT

Qcoom(E-commerce): Tech - React | Next JS | Scss | Antd | TailwindCss (Demo)
Responsibility:

- Rebuilt and redesigned the legacy site (old.qcoom.com) into a modern **Next.js**-based e-commerce platform (qcoom.com) with enhanced performance, UI/UX, and SEO
- Developed core e-commerce functionalities including **product listing, product details, add-to-cart, checkout flow**, and **EMI method integration**
- Implemented **real-time product search, category filtering, and pagination** for a seamless browsing experience
- Integrated **dynamic API data fetching** to render live product campaigns, offers, and pricing updates
- Ensured accessibility, mobile responsiveness, and cross-browser compatibility through design testing and component tuning
- Supported high-scale operations handling **1,000–1,500 daily orders**

City Bank Complaint Management System : Tech – Next.js | Ant Design | Tailwind CSS (Demo)
Responsibility:

- Designed and implemented **complaint submission forms**, dynamic filtering, and real-time ticket tracking features
- Developed dashboard UI for both customer **support agents and management** to view complaint analytics
- Integrated file **upload functionality,** automated notifications, and OTP verification for secure complaint filing
- Enabled **role-based access** control to manage visibility and actions across different user levels (agent, admin, supervisor)
- Enabled scalable handling of **2,500–3,000 daily support requests**

HR + Task Management: Tech – JavaScript | HTML | CSS | Bootstrap | React | Ionic | Scss (Demo)
Responsibility:

- Developed enterprise HR management system handling **300+ employee records** including attendance, leave, payroll, and procurement
- Built role-based access system for HR staff, managers, and employees
- Designed and implemented task management module with priority setting, progress tracking, notes, and collaboration features
- Built cross-platform mobile-friendly application using Ionic + React
